

TRUST BOARD – 5th MARCH 2015

QUALITY AND PERFORMANCE REPORT – JANUARY 2015

DIRECTOR:	Rachel Overfield, Chief Nurse Kevin Harris, Medical Director Richard Mitchell, Chief Operating Officer Emma Stevens, Acting Director of Human Resources
AUTHOR:	
DATE:	5th March 2015
PURPOSE:	The following report provides an overview of the January Quality & Performance report highlighting NTDA/UHL key metrics and escalation reports where required. It includes a Chief Executive's summary of key issues.
PREVIOUSLY CONSIDERED BY:	Integrated Finance, Performance and Investment Committee Quality Assurance Committee
Objective(s) to which issue relates *	<input checked="" type="checkbox"/> 1. Safe, high quality, patient-centred healthcare <input checked="" type="checkbox"/> 2. An effective, joined up emergency care system <input checked="" type="checkbox"/> 3. Responsive services which people choose to use (secondary, specialised and tertiary care) <input checked="" type="checkbox"/> 4. Integrated care in partnership with others (secondary, specialised and tertiary care) <input checked="" type="checkbox"/> 5. Enhanced reputation in research, innovation and clinical education <input checked="" type="checkbox"/> 6. Delivering services through a caring, professional, passionate and valued workforce <input checked="" type="checkbox"/> 7. A clinically and financially sustainable NHS Foundation Trust <input type="checkbox"/> 8. Enabled by excellent IM&T
Please explain any Patient and Public Involvement actions taken or to be taken in relation to this matter:	
Please explain the results of any Equality Impact assessment undertaken in relation to this matter:	
Organisational Risk Register/ Board Assurance Framework *	<input checked="" type="checkbox"/> Organisational Risk Register <input checked="" type="checkbox"/> Board Assurance Framework <input type="checkbox"/> Not Featured
ACTION REQUIRED *	
For decision <input type="checkbox"/> For assurance <input checked="" type="checkbox"/> For information <input type="checkbox"/>	

- ♦ We treat people how we would like to be treated
- ♦ We do what we say we are going to do
- ♦ We focus on what matters most
- ♦ We are one team and we are best when we work together
- ♦ We are passionate and creative in our work

* tick applicable box

CHIEF EXECUTIVE'S ISSUES TO HIGHLIGHT REPORT

Exception reports are automatically triggered when pre-set national or local thresholds are met. The issues that I wish to particularly highlight/comment on for January are as follows:

Clostridium Difficile (page 10)

In January we were back on trajectory for our national targets and we remain on course to deliver the national target. NHS England have recently released 15/16 trajectories for Acute Trusts with the UHL's trajectory confirmed as 61. There remain significant discussions with Interserve on the quality of cleaning. This continues to be managed as part of the contract process.

Never Events (page 11)

The Never Event reported in January was one of the two cases reported in the December Q&P and is not a new Never Event. Follow up of these events will take place at both EQB and QAC, so as to minimise the chances of a recurrence.

Maternal Deaths (page 12)

There was an unexpected indirect maternal death in January reported to the Coroner, but an inquest was not required. A decision was made by the CCG that an RCA investigation was not required as there were no omissions or mismanagement in care that led to the indirect maternal death.

Fractured Neck of Femur (page 17)

It is disappointing that we are not seeing any improvement in this key quality metric with performance below trajectory for the last 6 months. The Listening into Action group is now underway.

RTT Admitted (page 19)

It is encouraging to see that RTT backlog (18+ week waiters) continues to improve and that we are delivering 2 out of the 3 RTT targets. Backlog trajectories for both admitted and non-admitted patients have been signed off with the TDA and commissioners. Risks and mitigation plans are included in the exception report with delivery of admitted performance still expected April 2015.

Diagnostic waits (page 20)

Performance was very disappointing for a second month with a further deterioration in performance to 5%. Areas that contributed to this poor performance include MRI, Endoscopy, and Sleep studies due to insufficient capacity plus Dexa Scans due to a system failure. Action has been taken to resolve these issues and the good news is that the February position is looking much better with performance expected to be below the threshold of 1%.

Cancer (page 21)

It's encouraging to see that the two week wait standard was met in December. We still have work to do on the 31 day target (which is failing due to Urology) but this is now improving. A recovery plan for 62 day target has been submitted to the CCGs with the plan to recover monthly performance in July and cumulative performance by September.

John Adler

S3 Never events

		Target	Jan 14	YTD	Forecast								
What is causing underperformance?	What actions have been taken to improve performance?	NIL	1	3	3								
<p>A patient was listed for surgery at Melton Hospital by a Podiatric Surgeon to straighten the 3rd toe on her right foot.</p> <p>On the morning of surgery (22 December 2014) the Podiatry Assistant confirmed with the patient the site and documented consent. She marked the patient's foot on the top with an arrow pointing towards the 3rd toe.</p> <p>Whilst the latter was taking place the Podiatric Surgeon reviewed the MRI images for the patient and considered that the 2nd toe on the right foot required surgery.</p> <p>The patient was brought into the theatre and the WHO checklist completed whilst the Surgeon was scrubbing up. He was not fully engaged in the check and the Podiatry Assistant was not present in Theatre to participate in the checks. Surgery was undertaken on the 2nd toe.</p>	<ol style="list-style-type: none"> 1. Change in practice: marking extending to digit implemented immediately. 2. Messages regarding WHO checklist reinforced at meeting on 6 January 2015 with teams involved. 3. Podiatry Assistant must be present in theatre when WHO checklist completed. 	<p>2013/14 Performance by Quarter</p> <table border="1"> <thead> <tr> <th>13/14 Q1</th> <th>13/14 Q2</th> <th>13/14 Q3</th> <th>13/14 Q4</th> </tr> </thead> <tbody> <tr> <td>0</td> <td>0</td> <td>1</td> <td>2</td> </tr> </tbody> </table> <p>Three Never Events will trigger UHL as 'red' on this indicator for 2014/15.</p>				13/14 Q1	13/14 Q2	13/14 Q3	13/14 Q4	0	0	1	2

		Lead Director	Moira Durbridge, Director of Safety and Risk										

Commentary:

1. The definition of a Never Event is: "Serious, largely preventable PSIs that should not occur if the available preventative measures have been implemented by healthcare providers".
2. In relation to UHL performance:
 - In 2012/13, UHL reported 6 Never Events
 - In 2013/14, UHL reported 3 Never Events
 - For Quarters 1 and 2 in 2014/15, there were no Never Events reports and good compliance with the regulatory framework was demonstrated. However, in Quarter 3, 2014/15, 2 Never Event was reported and in Quarter 4, 1 Never event has been reported to date.
3. Case One Never Event occurred because the surgeon made an assumption rather than undertaking a definitive check.
4. Case Two Never Event occurred because of non-compliance in respect of certain elements of the Safer Surgery Policy.

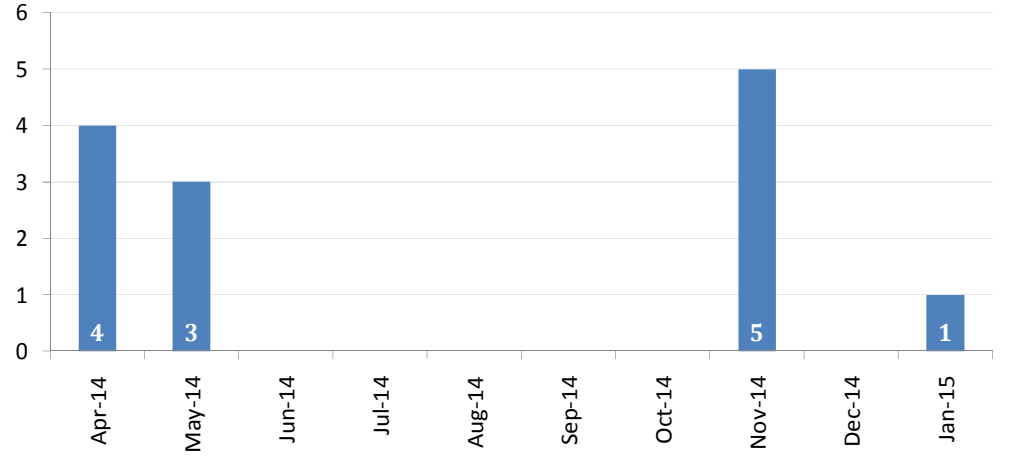

S17 – Maternal Deaths

INDICATOR:																	
Reason for Breach/Exception Report	Actions that have been taken or are planned to prevent recurrent, where applicable	Target	Latest performance	YTD performance	Forecast performance for next reporting period												
<p>A lady was admitted to ED late January via ambulance with sudden onset of right sided weakness, vomiting and increasing blood pressure. A diagnosis of a catastrophic left hypertensive bleed with compression of the ventricles was made. Following discussion with QMC, surgery was ruled out. The lady deteriorated and died on ITU the next day. On admission to ED there was a suspicion that she may be pregnant – a scan later confirmed a pregnancy of approximately 19 weeks. The lady's husband was unaware that she was pregnant.</p>	<p>This unexpected maternal death was reported to the Coroner, but an inquest is not required.</p> <p>The CCG and NHS England were informed. Confirmation was received that the patient had not been seen by her GP in over 6 months.</p> <p>As per CCG guidance this had to be escalated as a maternal death. A decision was made by the CCG that an RCA investigation was not required as there were no omissions or mismanagement in care that led to the indirect maternal death.</p>	0	1	1	0

W9 Sickness absence

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest month	YTD performance	Forecast performance for next reporting period																				
<p>1. Sickness absence is reported a month in arrears.</p> <p>2. There has been an increase in sickness absence from July 2014 of 1.39%.</p> <p>3. Sickness levels for December 2014 are the same as those first reported for December 2013 - 4.7%.</p> <p>4. Sickness absence reporting highlights an adjustment of around 0.5% due to late closures. It is therefore expected the December 2014 sickness absence rate will be adjusted in the coming months.</p> <p>5. In the last two years December 2012 to December 2014 we have seen:</p> <p>a. A reduction in staff taking sickness absence (December 2012 – 67.2%, December 2014 – 65.6%)</p> <p>b. An increase in staff taking sickness absence in excess of 28 days (December 2012 – 7.6%, December 2014 – 8.28%)</p> <p>6. Feedback from Clinical Management Group and Directorates Leads indicates that the increased sickness absence is due to :-</p> <p>a. Increased operational pressures / activity</p> <p>b. Seasonal variations</p> <p>c. Inaccurate data – delays in closing absences</p> <p>d. Management changes / handovers</p> <p>e. Vacancies and other absences reducing management time</p> <p>f. Service pressures delaying sickness absence management</p>	<p>1. Improved data through weekly SMART (Sickness Monitoring and Reporting Team) reports forwarded to lead managers highlighting open absences, closed absences and triggers (3 episodes / more than 10 days / 2 working weeks)</p> <p>2. Discussion at CMG / Directorate Boards and across services / areas with specific actions confirmed</p> <p>3. Circulation of breakdown of CMG performance by cost centre covering monthly and cumulative sickness absence.</p> <p>4. Making it Happen Reviews, to discuss and agree actions for the management and support of open absences, 'triggers' and complex cases with line managers.</p> <p>5. 6 monthly CMG Sickness Performance Reviews / Case reviews with Occupational Health and Senior and independent HR colleagues.</p> <p>6. Sickness Absence training continues for line managers, and a new programme has been introduced for those administering the sickness absence paperwork.</p> <p>Further Actions:</p> <p>7. In addition to the corporate sickness absence training, local training is facilitated for CMG's / Directorates in response to specific needs – management of long term absence, documentation etc.</p> <p>8. Local actions to address high sickness absence include CMG Management Team 'Hot Spot' meetings, Staff Engagement events to reduce sickness absence and improve the management of sickness absence.</p> <p>9. Improvement plans including timescales are discussed and agreed at CMG / Directorate level to reduce sickness absence and increase performance in the management of sickness absence.</p> <p>10. Specific staff support and targeted management of stress related absences.</p>	<p>UHL Stretch target 3% (previous SHA target 3.4%)</p>	<p>4.8%</p>	<p>3.7% (average)</p>	<p>3.50% average (April 2015)</p>

W13 – Statutory and Mandatory Training

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest performance	YTD performance	Forecast performance for next reporting period								
<p>We note that Statutory and mandatory Training is underperforming for the second month in a row.</p> <p>This minimal underperformance (by approx. 1%) results primarily from a reduction in attendance at face to face training sessions and completion of eLearning during December and January 2015 given service demands and pressures.</p> <p>We recognise that attendance at face to face training relies on staff being covered to attend, particularly in clinical areas and therefore generally completion rates for fire, resuscitation and manual handling training are lower than previous months.</p> <p>The underperformance is also partly due to the expiry of certain eLearning courses that were massively subscribed to in January 2014 due to targeted campaign such as Information Governance. Therefore the number of staff that are out of date for this programme in January 2015 are significant.</p>	<p>1,200 team leaders (as recorded on the eUHL System) with access to the 'Team Builder' function have been contacted directly and requested to focus upon key training including Information Governance Training.</p> <p>The Core Training Team has liaised with the Moving & Handling team to improve engagement and clarity regarding attendance and access to their training sessions.</p> <p>All Subject Matter Experts are being contacted to identify and share across the group successful strategies.</p> <p>A new guide to 'Checking your Required Training' will be distributed to all staff during February to improve compliance levels and increase awareness of the targets and the necessity of training completion.</p> <p>Automated Reminder emails will be generated by the eUHL system before courses expire. This has been in development since September and should be up and running before the end of February 2015.</p>	31 st March, 2015 – 95%	6 th Feb, 2015 – 89%	89%	95% at end of Quarter 4 / Year End

E12 – No. of # Neck of femurs operated on 0-35 hrs - Based on Admissions

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest month performance	YTD performance	Forecast performance for next reporting period																																
<p>All of the issues set out in previous reports continue in the service and are exacerbated at times of heightened activity.</p> <p>The acceptance of out of area elective and emergency spinal work is having a detrimental effect on the main trauma capacity as spinal patients are medically prioritised over 'other' trauma which has a knock on effect on #NOF capacity. With this additional demand the current theatre capacity for trauma is insufficient and patients have to wait longer than usual whilst short notice additional operating sessions are arranged.</p> <p>Work continues within the spinal network with regards to spinal capacity across the region and how UHL fits into the future plans.</p>	<p>An action plan from the recent preoperative LiA listening event is being written up.</p> <p>The 4 main work streams are:</p> <ul style="list-style-type: none"> • ED Admissions • Medical Work Up • Theatre Scheduling • Theatre Productivity <p>Project teams are set up to look at each of the work streams in detail and produce their individual action plans for delivery of improvement within the LiA timescales.</p> <p>The LiA sponsor group continue to meet weekly to push actions forward and assess progress.</p> <p>A meeting took place with the CCG to discuss which aspect of the Trauma service should be included in the quality schedule. It was agreed that time to theatre is the most significant and achievement of this would almost guarantee success in the remaining indicators. Realistically this will not be achieved until all of the LiA work is complete and embedded. The date given for achievement was the end of Q3 2015/16</p>	72%	58%	61%	62%

R3 – RTT Waiting Time - Admitted

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest performance	YTD performance	Forecast performance for next reporting period				
<p>The admitted backlog is too high to deliver sustained performance of the admitted target.</p> <p>Reduction in the size of the backlog has been significant but the progress in the next 2 months has to be accelerated in key specialities.</p> <p>By key speciality:</p> <p>-Ophthalmology, continues to perform well.</p> <ul style="list-style-type: none"> • General surgery, backlog continues to reduce as planned. • Urology the backlog has not reduced and is a significant cause of concern. • Max fax backlog has reduced but the paediatric element has been hampered by lack of paediatric elective capacity as have both paediatric surgery and urology • Gynaecology, has seen a steady reduction in the backlog this needs to accelerate in March. • Orthopaedics, backlog has remained static. It is a significant risk due to the unsustainable non admitted backlog position 	<p>The Trust is achieving 2 of the 3 RTT standards: Non admitted performance is 95.4% against a target of 95%.</p> <p>Incomplete performance 95.2% against a target of 92%.</p> <p>The revised weekly access meeting is working well as is the predictive ability of ensuring delivery.</p> <p>The TDA has requested a reduction in the total backlog of 370 patients. The Trust is on track to deliver this through:</p> <ul style="list-style-type: none"> • Additional activity at weekends until the end of March • Urology additional in house and independent sector activity has started. • Additional weekend work across the paediatric specialities has also started • Additional work in house but also with the local independent sector. Over 500 patients sent to the IS. There are also 75 patients sent from Orthopaedics • Orthopaedics remains the greatest risk to the Trust RTT performance. Weekend working continues, additional outsourcing to the local Independent sector for elective activity has also started. 	90% treated within 18 weeks	85% (UHL and Alliance)	85%	86%				
<p>The graph below illustrates the backlog reduction at Trust level</p>  <p>Risks Orthopaedics and Urology remain the biggest risks to the Trust overall performance. The TDA agreed backlog by the end of February is no more than 814. As at the end of January this stood at 915. Agreement has been reached with both the TDA and commissioners that backlog reduction should continue with the clear aim of admitted achievement during April 2015.</p> <p>Mitigation All key speciality plans being reviewed by Director of Performance and Information. Urology on weekly meetings. Orthopaedics on daily reporting of key improvement metric. Re modelling of anticipated performance. Ongoing additional activity in key specialities. Additional outsourcing of activity in January to March, supported by TDA additional funding. Weekly CCG RTT meetings.</p> <table border="1" data-bbox="1061 1294 2181 1430"> <tr> <td data-bbox="1061 1294 1442 1362">Expected date to meet standard / target</td> <td data-bbox="1442 1294 2181 1362">April 2015</td> </tr> <tr> <td data-bbox="1061 1362 1442 1430">Lead Director / Lead Officer</td> <td data-bbox="1442 1362 2181 1430">W Monaghan, Director of Performance and Information C Carr, Head of Performance</td> </tr> </table>						Expected date to meet standard / target	April 2015	Lead Director / Lead Officer	W Monaghan, Director of Performance and Information C Carr, Head of Performance

R7 – Diagnostic Waiting Times

What is causing underperformance?	What actions have been taken to improve performance?	Standard	January 2015	YTD performance	Forecast performance for next reporting period
<p>The Trust is measured on the waiting times of the top 15 diagnostic modalities, these are reported at the end of each month. These modalities cross all CMGs</p> <p>Factors that have caused this under performance are:</p> <p>Imaging (accounting for 74% of breaches)</p> <ul style="list-style-type: none"> - Cardiac CT and MRI, there remains insufficient capacity – this is ongoing issue and these are supervised scans so need consultant radiologist availability. - MSK MRI , these are consultant specific test - Ultrasound. Agency dependent solution due to national shortage stopped for two weeks within December due to Christmas – This provided a special cause within January. <p>Dexa (accounting for 18%of breaches)</p> <ul style="list-style-type: none"> - During November there was a system failure resulting in the breaching of the standard. No alternative capacity available. <p>Endoscopy (accounting for 19% of breaches)</p> <ul style="list-style-type: none"> - Colonoscopy / Flexi sigmoidoscopy / Gastroscopy <p>Sleep studies (16 breaches)</p> <ul style="list-style-type: none"> - Capacity issues with Paediatric provision. <p>Additionally, there were small volumes of breaches of the standard in a number of other modalities.</p> <p>Collectively these have caused a breach of the standard a total of 431 patients waiting over 6 weeks.</p>	<p>Weekly diagnostic PTL meeting established to review future performance cross CMG and develop shared learning of a multi CMG provision.</p> <p>Control totals established to help focus delivery with additional capacity where there is risk of breaching encouraged, in addition to dating patients in date order</p> <p>February performance on track for 1% deliver currently, with further validation to follow.</p> <p>Trajectory is for future months to deliver nearer to 0.8% performance.</p> <p>Cardiac CT and MRI Additional sessions being carried out by cardiologists during December to February. Radiographer led scanning to be implemented February (CT) and April (MR). InHealth mobile unit on-site 13 days February/March</p> <p>MSK imaging capacity New MSK radiologist has started, with locum continuing to help manage backlog.</p> <p>Dexa Scanner now repaired. Contingency plan between Imaging and Rheumatology implemented. Recovery plan implemented within January, benefits to be seen within February return. Currently tracking <0.8% delivery for next submission.</p> <p>Endoscopy Additional endoscopy work is being carried out by Medinet on UHL site from mid January. Recovery plan implemented within January, benefits to be seen within February return. Currently tracking <0.8% delivery for next submission.</p> <p>All other modalities Pro-active PTL management, additional capacity.</p>	<p><1% over 6 weeks</p>	<p>UHL and Alliance combined 5.0%</p>	<p>5.0%</p>	<p>1%</p>
		<p>Risks:</p> <p>There remain risks to achievement of this standard due to the instability of a number of diagnostic modalities which collectively make up this standard although increased visibility and forward planning within nascent PTL meetings will mitigate against this.</p> <p>Capacity pressures within MR and paediatric sleep studies/endoscopy remain a challenge.</p>			
		<p>Expected date to meet standard / target</p>	<p>November 2014</p>		
		<p>Revised date to meet standard</p>	<p>February 2015</p>

R16-R22 - cancelled operations

INDICATOR: The cancelled operations target comprises of three components:

1. The % of cancelled operations for non-clinical reasons On The Day(OTD) of admission
2. The number of patients cancelled who are offered another date within 28 days of the cancellation
3. The number of urgent operations cancelled for a second time.

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly) 1) On day=0.8% 2) 28 day = 0 3) urgent second time=0	Latest month performance – Jan 15	YTD performance (inc Alliance)	Forecast performance for next reporting period																																																
<p>This month UHL is compliant with the 0.8% target. This target has not been achieved in winter since 2010. Last year January UHL had 151 cancellations (1.6%). There were 78 fewer cancellations this January.</p> <p>The OTD cancellation reasons remain similar to last month. 21 out of 74 were patients cancelled due to HDU/ITU bed unavailability.</p> <p>Emergency admissions to the LRI critical care unit increased significantly this year compared to the last three years adding pressures to OTD cancellations and 28 days breaches in January.</p> <p>There were four, 28 day breaches due to ITU/HDU pressures or complex procedures requiring specific medical input.</p>	<p>A number of work streams have started aimed at reducing OTD cancellations including a LIA project.</p> <p>A successful LIA event was completed with participation of 48 staff in all three sites. Lots of useful feedback and a number of new ideas were provided by the staff to reduce cancellations. The LIA team are working to implement the changes suggested.</p> <p><u>Risks to delivery of recovery plan</u></p> <p>HDU and ITU bed availability due emergency pressures are still a high significant risk to OTD cancellations and 28 day breaches. The situation has been monitored on a daily basis to try to prevent OTD cancellations. Plans are in discussion to improve the patient booking processes and maintain a realistic number of bookings who will require critical care post operatively.</p>	<p>1) 0.8%</p> <p>2) 0</p> <p>3) 0</p>	<p>1) 0.8 %</p> <p>2) 6</p> <p>3) 0</p>	<p>1) 0.9%</p> <p>2) 39</p> <p>3) 0</p>	<p>1) 0.9%</p> <p>2) 3</p> <p>3) 0</p>

R23 Delayed Transfers of Care

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest month performance	YTD performance	Forecast performance for next reporting period																																																																																																																																				
<p>There has been an decrease in delays due to DTOC in December and January.</p> <p>There remains concern about the availability of packages of care in the County Local Authority. Interim placements in care homes are offered to patients but are not always accepted.</p> <p>There continue to be a number of DTOCs due to slow discharges to care homes.</p> <p>A large number of patients remain delayed whilst waiting for community hospital beds. There are robust mechanisms for transferring patients as soon as possible, but mixed sex and location issues remain issues that delay discharge</p>	<p>The ICRS and ICS teams continue to attend wards to identify patients that they could take directly in to their home based services. This has been particularly successful with the City services and lessons learnt are being discusses with county colleagues</p> <p>There is on-going emphasis regarding therapists reducing the required package of care to try to ensure faster discharge which appear to have had some success.</p> <p>Local Authority staff have been asked to ensure that patients are not offered choice about accepting an interim placement, which appears to have had some success in discharging patients.</p> <p>Ward Two at the LGH has been closed. Good working around discharging directly from wards rather than transferring patients to Ward 2 who were know DTOCS has been instrumental in closing this facility.</p>	3.5%	3.2%	4.2%	4.5%

R25 and R26 Ambulance handover > 30 minutes and >60 minutes

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest month performance	YTD performance	Forecast performance for next reporting period																																												
<p>Difficulties in accessing medical beds continue to lead to a backlog in the assessment area of ED. This delays movement out of the assessment area and delays handover. January's performance improved due to consistently having beds in AMU so improving flow out of the ED.</p> <p>It should be noted that the overall attendances in January via ambulance have gone down by 27 compared to December</p>	<p>A further meeting took place with EMAS in January. There are a series of actions that are being progressed to manage delays in handover.</p> <p>Key ones include visibility of patients on 'the stack' for ED to highlight a likely problem. This allows ED to try an pre-empt delays in handover.</p> <p>To review clinical in put in to 111 calls to try to avoid unnecessary attendances</p> <p>Clarification on communication process for when there is build-up of delays in ED</p>	0 delays over 30 minutes	> 60 min 6% 30-60 min – 24% 15-30 min – 33%	> 60 min 3% 30-60 min – 17% 15-30 min – 36%

RS2A Proportion of commercial contract studies achieving their recruitment target during their planned recruitment period

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest month performance	YTD performance	Forecast performance for next reporting period	
<p>East Midlands is currently 6th of the 15 LCRNs for this metric with no LCRN currently achieving the 80% target, highest is currently 65%</p> <p>A lot of variables impact on recruitment achieved, after the recruitment target is set, for example:</p> <ul style="list-style-type: none"> • Impact of global performance and earlier end dates giving less time to recruit • Changes in UK practice during set up/ recruitment • Protocol changes prior to initiation • Understanding of targets and alignment on the source of the target sites are measured on 	<ol style="list-style-type: none"> 1. Migration of the performance data for all open and closed commercial research onto one internet based system to track performance for 2014/15. 2. Implementation of a provisional performance management process involving the Industry Team and Delivery Managers to escalate studies not recruiting to target within 24 hours and to align targets. 3. Meetings with key research teams to discuss the importance of target setting and aligning the approach across the region so the target is reflective of the contract figure. 4. 6 to 8 weekly performance meetings with delivery managers have been introduced to address this issue from the start of December. 5. Collation of local information to report on the actual figure to take account for the lag in National reporting. 	80%	56%	56%	56%	
					Expected date to meet standard / target	April 2015
					Revised date to meet standard	May 2015

RS6A : Proportion of NHS Trusts recruiting each year into non-commercial NIHR CRN Portfolio studies

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest month performance	YTD performance	Forecast performance for next reporting period		
<p>The NIHR Clinical Research Network has an HLO with the Department of Health for 99% of Trusts in England to recruit to CRN Portfolio research each year. This has been passed down to local research networks.</p> <p>There are 16 Trusts within the East Midlands region, with 14 Trusts currently reporting recruitment. The two who have not reported any recruitment are:</p> <ul style="list-style-type: none"> • East Midlands Ambulance Service NHS Trust (EMAS) • Lincolnshire Community Health Services (LCHS) 	<p>1. EMAS: have received funding in 2014/15 for a Research Paramedic. This post currently supports two NIHR Portfolio studies that do not report recruitment in the traditional way due to patient assent taken rather than consent. EMAS have four studies in the pipeline that are due to open this financial year. One of those studies, AIRWAYS II, may report report participant recruitment this financial year.</p> <p>2. LCHS: this Trust supports several CRN Portfolio studies, however the consent event occurs in the primary care setting so the recruitment is attributed to Clinical Commissioning. There is scope for research within the community services (paediatrics, district nursing) that is being investigated, however it is unlikely that this Trust will report recruitment this financial year.</p>	99%	88% (red)	88% (red)	88%		
		<p>It is unlikely we will make the 99% target due to the nature of the services provided by LCHS. We may reach 94% by April 2015.</p>	Expected date to meet standard / target	It is unlikely we will make the 99% target due to the nature of the services provided by LCHS. We may reach 94% by April 2015.			
			Revised date to meet standard				
			Lead Director / Lead Officer	Elizabeth Moss, Chief Operating Officer CRN: East Midlands			

RS6b Proportion of NHS Trusts recruiting each year into commercial NIHR CRN Portfolio studies

What is causing underperformance?	What actions have been taken to improve performance?	Target (mthly / end of year)	Latest month performance	YTD performance	Forecast performance for next reporting period																																												
<p>There are 16 Trusts within the East Midlands region, with 9 Trusts currently recruiting to commercial studies. The seven who have not reported any recruitment are:</p> <ul style="list-style-type: none"> ● East Midlands Ambulance Service NHS Trust (EMAS) ● Derbyshire Community Health Services NHS Foundation Trust (DCHS) ● Lincolnshire Community Health Services (LCHS) ● Leicestershire Partnership NHS Trust (LePT) ● Lincolnshire Partnership NHS Trust (LiPT) ● Nottinghamshire Healthcare NHS Foundation Trust (NHFT) ● Derbyshire Healthcare NHS Foundation Trust (DHFT) 	<ol style="list-style-type: none"> 1. EMAS: Currently no open commercial studies nationally run by ambulance services on the NIHR portfolio, therefore unlikely that EMAS will open a commercial study this financial year. Industry team currently reviewing studies previously run at other ambulance services across the country to gain insight. Meeting with Trust and RDM for Division 6 to discuss this month 2. DCHS: due to the nature of research within this Trust, they are unlikely to be involved in commercial research, Have met with Trust and a preliminary plan is in place to take this forward. 3. LCHS: due to the nature of research within this Trust, they are unlikely to be involved in commercial research. Met on the 18th December and a preliminary plan is in place to take this forward. 4. LePT: Selected for one study, due to open by the end of 2014. One study also being taken forward with sponsor and awaiting confirmation if selected 5. LiPT: have been involved in commercial research in the past and the site is actively seeking commercial opportunities 6. NHFT: One trial initiated at the end of November 2014, 2nd UK site to open 7. DHFT: One trial recently opened to recruitment closed early prior to recruitment. 2 studies in the pipeline. 	70%	56% (red)	56% (red)	56%

CQC – Intelligent Monitoring Report

The latest CQC Intelligent Monitoring Report (IMR) was published on the CQC website on the 3rd December 2014.

The IMR evaluates against a range of indicators relating to the five key questions used by the CQC as part of their inspections - is the organisation safe, effective, caring, responsive, and well-led?

Within each area of questions a set of indicators has been developed and each indicator has then been analysed to identify the following levels of risk for each organisation:

- 'no evidence of risk'
- 'risk'
- 'elevated risk'

The next publication date is May 2015.

Priority banding for inspection	Recently inspected
Number of 'Risks'	7
Number of 'Elevated risks'	1
Overall Risk Score	9
Number of Applicable Indicators	94
Percentage Score	4.79%
Maximum Possible Risk Score	188

Elevated risk	Whistleblowing alerts (18-Jul-13 to 29-Sep-14)
Risk	PROMs EQ-5D score: Groin Hernia Surgery (01-Apr-13 to 31-Mar-14)
Risk	Composite indicator: A&E waiting times more than 4 hours (01-Jul-14 to 30-Sep-14)
Risk	All cancers: 62 day wait for first treatment from NHS cancer screening referral (01-Apr-14 to 30-Jun-14)
Risk	Proportion of ambulance journeys where the ambulance vehicle remained at hospital for more than 60 minutes (01-Apr-14 to 30-Apr-14)
Risk	TDA - Escalation score (01-Jun-14 to 30-Jun-14)
Risk	GMC - Enhanced monitoring (01-Mar-09 to 22-Jul-14)
Risk	Patient Opinion - the number of negative comments is high relative to positive comments (28-May-13 to 27-May-14)

Quality Schedule and CQUIN Schemes

Confirmed RAG's for Quarter 3 and predicted RAG's for Quarter.

Ref	Indicator Title	Q1 RAG	Q2 RAG	Q3 RAG	Q4 Predicted RAG	Commentary
QUALITY SCHEDULE						
PS01	Infection Prevention and Control Reduction. - C Diff	G	A	tbc	G	Q2 Amber RAG remains as Multi Drug Resistant data not submitted. Monthly reporting of C Diff. Threshold for 14/15 is 81. UHL is aiming to achieve a reduction on last year's total of 66 and has given itself a Target of 50. 61 cases as at end of January which is below the NTDA trajectory but above UHL's own threshold. Q3 RAG to be confirmed at the March CQRG
PS02	HCAI Monitoring - MRSA	0	1	2	G	1 in October and 2 in December. All reviews to date confirm these were unavoidable. None reported in January.
PS03	Patient Safety – SIs, Never Events	G	G	2	1	Q3 & Q4 Red RAG for Never Events. (relating to 'wrong sized hip prosthesis, retained Swab ties and wrong site surgery Q3 Patient Safety Report due to be presented to the March CQRG. Number of incidents reported continues to rise. But there has been a reduction in number that resulted harm.
				tbc	G	
PS04	Duty of Candour	0	0	0	0	No breaches to date.
PS05	Complaints and user feedback Management (excluding patient surveys).	A	A	G	G	Complaints responses performance improved and achieved for December. Q3 RAG to be confirmed at the March CQRG.
PS06	Risk Assurance and CAS Alerts	A	A	G	G	Amber RAG for Q2 relates to overdue CAS alerts for July. All risk reviews back on track for Q3. No overdue CAS alerts and all risk reviews and actions on Track
PS07	Safeguarding – Adults and Children	G	G	G	G	Assurance documentation due to be sent to CCG Safeguarding leads for their review ahead of their observational visit to the Trust.
PS08	Reduction in Pressure Ulcer incidence.	G	G	R	G	Monthly thresholds met for G3 HAPUs. Above the monthly trajectory for Grade 2 HAPUs in both Nov (13) and Dec (11) and Grade 4. Within trajectory for both G2 and G3 for Jan and No Grade 4.
PS09	Medicines Management Optimisation	A	G	A	G	Commissioners noted improvement in Controlled Drugs audit report and also Medicines Code but thresholds not fully achieved. Progress made with developing LLR Medicines Optimisation Strategy.
PS10	Medication Errors	G	G	G	G	Increased reporting of errors and actions being taken.
PS11	Venous Thromboembolism (VTE) and RCAs of Hospital Acquired Thrombosis	95.7%	96.1%	G	G	Preliminary data suggested Dec performance below 95% for VTE risk assessment but case note review confirmed actual performance above 95% and Q3 performance overall = 95.6%. RCAs in progress for Q3 Hospital Acquired Thrombosis. RAG

Ref	Indicator Title	Q1 RAG	Q2 RAG	Q3 RAG	Q4 Predicted RAG	Commentary
PS12	Nutrition and Hydration	G	>80%	>85%	tbc	Work programme on track for nutrition, some delays with hydration actions. Threshold achieved for all measures across all CMGs with exception of ESM for 'Protected Mealtimes'.
PE1	Same Sex Accommodation Compliance and Annual Estates Monitoring	2	0	2	0	2 breaches in Q3. No breaches to date for Q4
PE2	Patient Experience, Equality and Listening to and Learning from Feedback.	G	G	tbc	G	Good progress made with triangulation of data. Waiting time main area for improvement. RAG tbc at March CQRG
PE3	Improving Patient Experience of Hospital Care (NPS)	N/A	N/A	N/A	tbc	Not due to be reported until March 15. RAG dependent upon results in the National Patient Survey.
PE4	Equality and Human Rights	G	G	G	G	Progress reported to the September CQRG with further information provided in October – relating to actions being taken to capture BME data
CE01	Communication – Content (ED, Discharge & Outpatient Letters)	A	A	tbc	G	Clinical Problem Solving Group held to agree key priorities. Letters policy finalised launched end of Jan 15. RAG tbc at March CQRG
CE02	Intra-operative Fluid Management	G	>80%	<80%	G	Performance deteriorated during Oct/Nov. 80% achieved for December. Remedial actions in place to maintain.
CE03	Clinical Effectiveness Assurance – NICE and Clinical Audit	A	A	G	G	Responses for NICE Clinical Guideline / Quality Standards documents on track and actions being taken where audits behind schedule
CE04	Women's Service Dashboard	A	A	tbc	tbc	Amber RAG for Q2 relates to increase in C Section Rate. Q3 RAG to be confirmed at the March CQRG
CE05	Children's Service Dashboard	A	A	tbc	tbc	Q2 Amber RAG relates to SpR training Q3 RAG to be confirmed at the March CQRG
CE06	Patient Reported and Clinical Outcomes (PROMs and Everyone Counts)	A	A	tbc	G	Groin Hernia PROMs improved, although still below the national average. Consultant Outcomes published and all consultants in line with national average. Q3 RAG to be confirmed at the March CQRG.
CE07	#NOF - Dashboard	51%	67.9%	62.1%	57.9	72% threshold not met for any month in Q3. Mainly relates to peaks in activity and spinal patients. Performance deteriorated for Jan. L/A programme in place and business case submitted to support increased theatre capacity.
CE08a	Stroke monitoring	G	G	A G	G	Red for '90% stay on Stroke Unit not achieved for Oct or for November TIA Clinic thresholds exceeded and improvements made for other Stroke indicators (time to Scan, admission to stroke unit, thrombolysis). SSNAP data for Q3 to be confirmed.
CE08b	TIA monitoring	76%	67%	73.4%	80.6%	Threshold achieve for each month for high risk patients and performance improved for low risk patients being seen within 7 days.

Ref	Indicator Title	Q1 RAG	Q2 RAG	Q3 RAG	Q4 Predicted RAG	Commentary
CE09	Mortality (SHMI, HSMR)	A	A	A	A	Latest published SHMI = 105 (104.7) and is slowly reducing but is still above 100.
CE10	Making Every Contact Count (MECC)	A	G	tbc	G	Referrals to STOP and ALW continue. 'Healthy Eating and Physical Activity publicity campaign due to commence in General Surgery and Sleep Clinics. Q3 RAG to be confirmed at March CQRG.
AS01	Cost Improvement Programme (CIP) Assurance	A	G	tbc	G	Q3 RAG revised upon review of additional assurance.
AS02	Ward Healthcheck (Nursing Establishment, Clinical Measures Scorecard)	G	G	G	G	Recruitment of additional nurses continues. Not all wards meeting 'Nurse to bed Ratio' but actions in place. Support being provided to those wards not meeting thresholds in the Clinical Measures Scorecard.
AS03	Staffing governance	A	A	A	A	Internal thresholds not met for Appraisal, Sickness and Corporate Induction or Turnover although improvement noticed. Medical Staffing Strategy submitted.
AS04	Involving employees in improving standards of care. (Whistleblowing)	G	G	G	G	Actions taken to address concerns raised.
AS05	Staff Satisfaction	G	G	G	G	
AS06	External Visits and Commissioner Quality Visits	G	G	G	G	Actions in response to Reviews being taken.
AS07	CQC Registration	A	G	A	G	2 Actions in response to CQC visit findings behind schedule – remedial actions being taken.
NATIONAL CQUINS						
Nat 1.1a	F&FT 1a - Staff	G	G	G	G	Implemented during Q1/2. No Staff F&FT survey undertaken in Q3 as National Staff Survey.
Nat 1.1b	F&FT 1b - OutPt & Day Case	G	G	G	G	F&FT already happening in Day Case and has started in Outpatients.
Nat 1.2	F&FT 1.2 - Increased participation - ED	16.6%	15.1%	16.2%	25.3%	Performance dropped significantly in November but up to 18.7% in December and YTD rate of 15.8% . Need to achieve 20% for Q4 to meet CQUIN requirements.
Nat 1.3	F&FT 1.3 - Inpt increase in March	35.8%	31%	34.7%	34.6%	Improvement in January and still on track to achieve Q4 30% threshold but need to further improve to achieve 40% for March 15 for additional CQUIN monies.
Nat 2.1	ST 2.1 - ST data submission	G	G	G	G	Data collection continues for all 4 harms.
Nat 2.2	ST 2.2 - LLR strategy	G	G	tbc	G	UHL contributing to the LLR Pressure Ulcer group and workstreams. Q3 RAG to be confirmed upon receipt of LLR Group minutes.

Ref	Indicator Title	Q1 RAG	Q2 RAG	Q3 RAG	Q4 Predicted RAG	Commentary
Nat 3.1	Dementia 3.1 - FAIR	G	G	G	G	90% thresholds met for all parts of the Dementia FAIR CQUIN.
Nat 3.2	Dementia 3.2 - Training & Leadership	G	N/A	N/A	G	Nicky Morgan is new Clinical Lead Dementia Training Programme reviewed and revised. Q4 RAG dependent on evidence of increased staff attending training.
Nat 3.3	Dementia 3.3 - Carers	G	G	G	G	Surveys carried out and evidence of actions being taken
LOCAL CQUINS						
Loc 1	Urgent Care 1 (Discharge)	G	G	G	tbc	Although no improvement in 'discharges before 11am/1pm' in Q3, Commissioners' noted increased capacity issues and work undertaken in Q3.
Loc 2	Urgent Care 2 (Consultant Assessment)	G	G	A	tbc	65% threshold exceeded for AMU but not achieved in other assessment areas. Audit data not felt to accurately reflect practice. Q4 audit to have increased clinical input to ensure accuracy but unlikely to achieve the 75% threshold across all areas.
Loc 3	Improving End of Life Care (AMBER)	G	G	G	G	New facilitators in post and Q3 threshold achieved.
Loc 4	Quality Mark	G	G	G	A	Quality Mark achieved for 6 out of the 8 wards to date. Although remaining 2 wards on track to achieve the QM, will be outside the agreed timescale for Q4.
Loc 5	Pneumonia	A	G	G	G	Q3 threshold achieved for all aspects of CQUIN scheme.
Loc 6	Think Glucose	G	G	G	G	Think Glucose programme on track.
Loc 7	Sepsis Care pathway	≥47%	≥60%	A	G	Not all 6 aspects of the Sepsis6 Care Bundle thresholds achieved in Q3. Remedial actions in place for Q4.
Loc 8	Heart Failure	≥49.5 %	≥63%	≥65%	tbc	Q3 65% threshold achieved and actions on track. Q4 RAG dependent upon achievement of 75% threshold.
Loc 9	Medication Safety Thermometer	G	G	G	G	All wards submitting data.
SPECIALISED CQUINS*						
SS1	National Quality Dashboards	G	G	G	G	Dashboards now open for data submission at end of Q3

Ref	Indicator Title	Q1 RAG	Q2 RAG	Q3 RAG	Q4 Predicted RAG	Commentary
SS2	Breast Feeding in Neonates	61%	66%	tbc	G	Threshold not fully achieved for Q3 with remedial actions in place.
SS3	Clinical Utilisation Review of Critical Care	N/A*	G	G	G	CCMDS and ICNARC data now being collected for all satellite HDUs.
SS4	Acuity Recording	N/A*	G	G	G	Acuity recording in place for all areas. Q4 RAG dependent upon being able to demonstrate effective use of Acuity data.
SS5	Critical Care Standards - Disch	N/A*	G	tbc	G	Reduction in delays but increase in out of hours transfers during December – related to increased activity in Critical Care.
SS6	Critical Care Outreach Team	N/A*	G	tbc	G	Q3 threshold not fully achieved. Remedial actions in place.
SS7	Consultant Assessment	G	G	tbc	tbc	Links to the CCG CQUIN.
SS8	Highly Specialised Services Collaborative Workshop	G	G	G	G	Q3 threshold is to provide update regarding participation in Clinical Benchmarking for both ECMO and PCO.
