None

Impact assessment
N/A

Purpose of the Report

This patient story relates to the experience of Saskia who is a young person who suffered a cardiac arrest whilst playing netball.

Saskia tells us her story about what it is like to live with an Implantable Cardioverter- Defibrillator (ICD) and how this affects her quality of life.

Due to university commitments Saskia is unable to join us, instead Chloe Ferguson, Nurse specialist in Inherited Cardiac Conditions is in attendance today to answer any questions about the service.

Recommendations

The Board of Directors are asked to:

- Listen to Saskia's Story
- Participate in the conversation
